

Arch

A screenshot of a terminal window titled "Arch Backup Clone Clone [Running] - Oracle VM VirtualBox". The terminal shows the command "neofetch" being executed in a root shell. The output displays system information in a stylized ASCII art format, including the OS (Arch Linux x86_64), Host (VirtualBox 1.2), Kernel (6.4.10-arch1-1), Uptime (21 secs), Packages (397), Shell (bash 5.1.16), Resolution (792x600), WM (sway), and Terminal (foot). It also lists hardware details: CPU (AMD Ryzen 7 5800H), GPU (VirtualBox Graphics Adapter), and Memory (114MiB / 1948MiB). At the bottom, there is a color calibration bar with various colored squares. The terminal window has a standard Linux prompt and a root shell indicator.
